

DEER REPELLENT RECIPE

To 1-quart spray bottle add:

1 beaten egg

1/4 cup milk

1 teas. vegetable oil

5 drops of clove oil

Water to fill the container

1/2 teas. liquid dish soap

*Spray once a month on roses, flowers, and shrubs.

TIPS:

Combine the ingredients in the order given and shake well to mix;
then add the dish liquid; otherwise, you get lots of suds.

Prepare and use the mixture the day it's made; don't save it.

After use, rinse out the container and spray clean water through
the nozzle; dried egg & sour milk may clog up the works if you don't.

Vials of clove oil can be purchased from health food stores and craft shops.

It's recommended to spray once a month, but spraying more often
or after it rains, will do no harm.

Best of Luck!
